

Order A (published topical order): big boost on the newcomer, ~zero impact on everyone else
NM 3-shot / 30-way · matched step 40k · within-balanced · Δ regret gap between consecutive rungs = Δ AUC (best-per-graph reference cancels)
every bar = Δ regret gap at that step on one shared scale · newcomer = the added graph; the in-mix / out-of-mix means stay within ± 0.006 of zero
