

Compact Collab experiment: training and validation curves

Train on 2016 links; select on 2017 links. All six runs completed 2,000 updates.

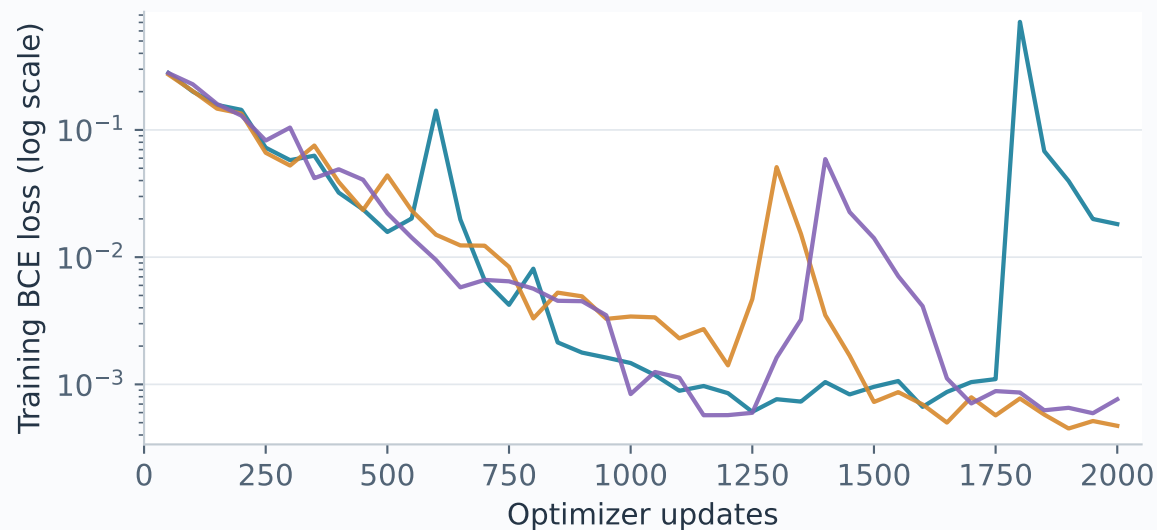

Structure-only · 36,909 fitted scalars

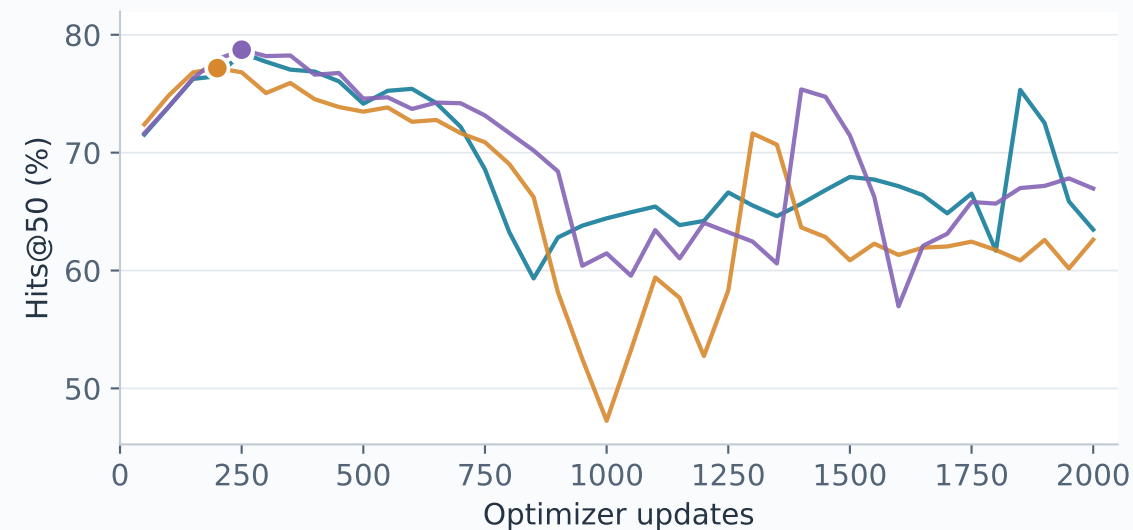

2017 validation · dots mark selected checkpoints

Joint graph + features + structure · 496,429 fitted scalars

2017 validation · dots mark selected checkpoints

Raw checkpoint samples every 50 updates; no smoothing. Training loss is a sampled minibatch, not a full-panel average. These are historical selection curves, not the official 2018 assessment or 2019 test.
