

Accuracy

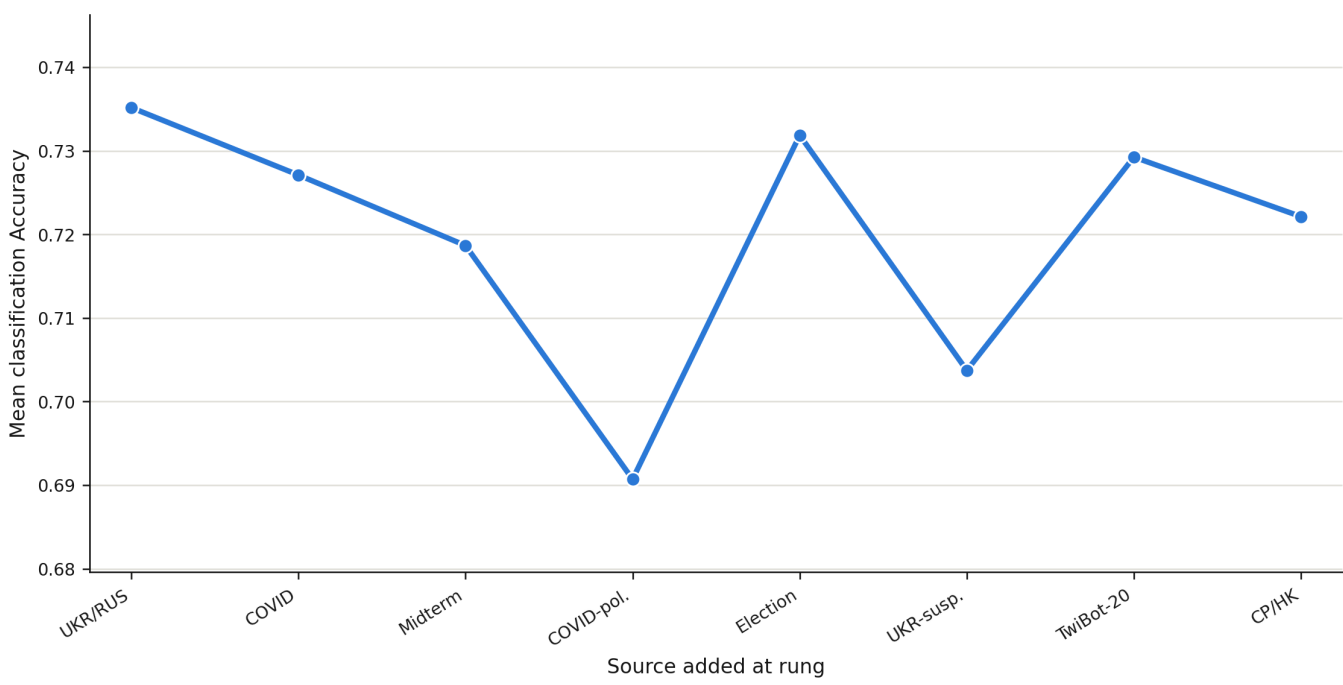

Classification Accuracy across mixture size

Matched 40k · A · Fixed total compute (40k steps) · mean across four evaluation graphs

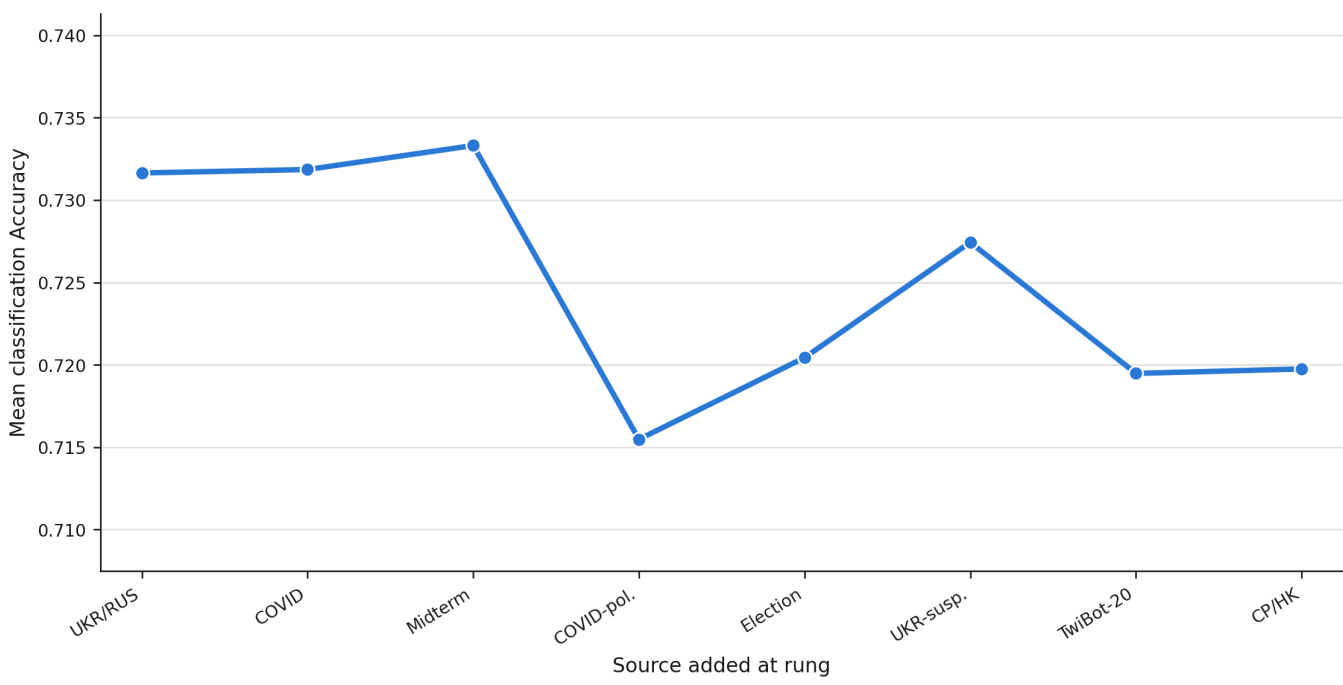

Classification Accuracy across mixture size

Sequential · A · Sequential schedule · fixed total compute (40k steps) · mean across four evaluation graphs

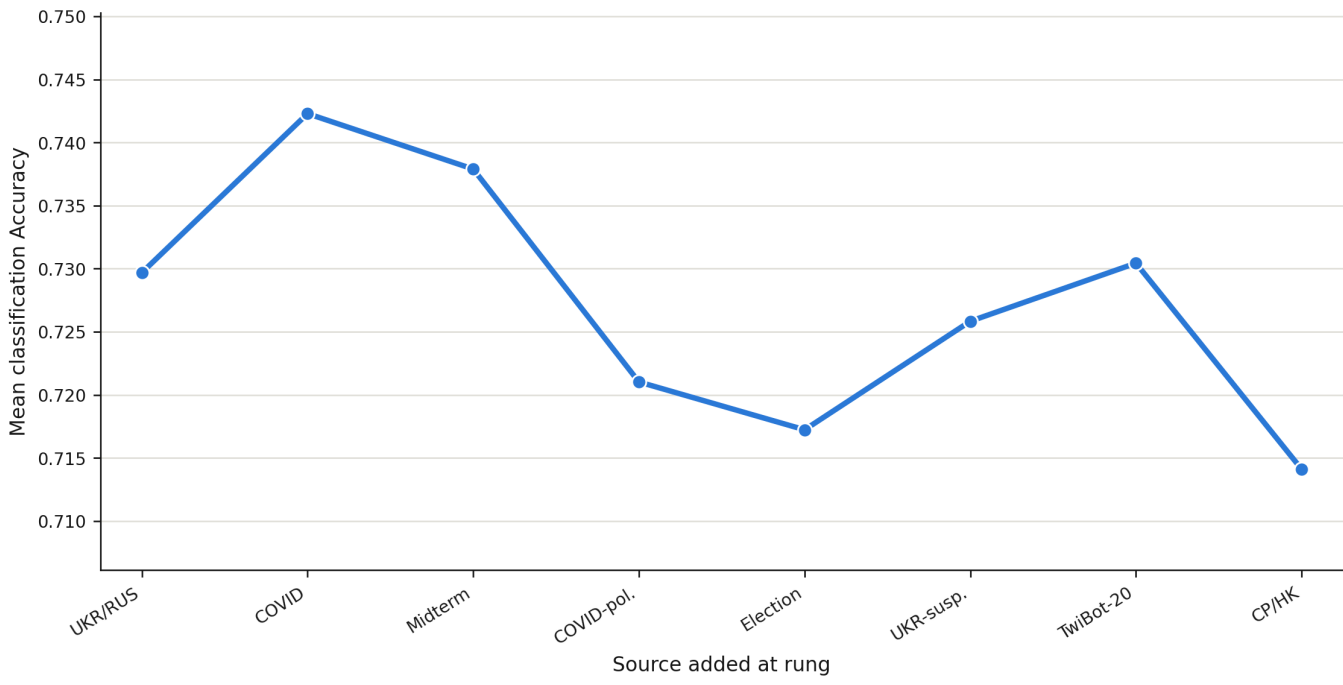

Classification Accuracy across mixture size

Split-aware · A · Split-aware · fixed total compute (40k steps) · mean across four evaluation graphs

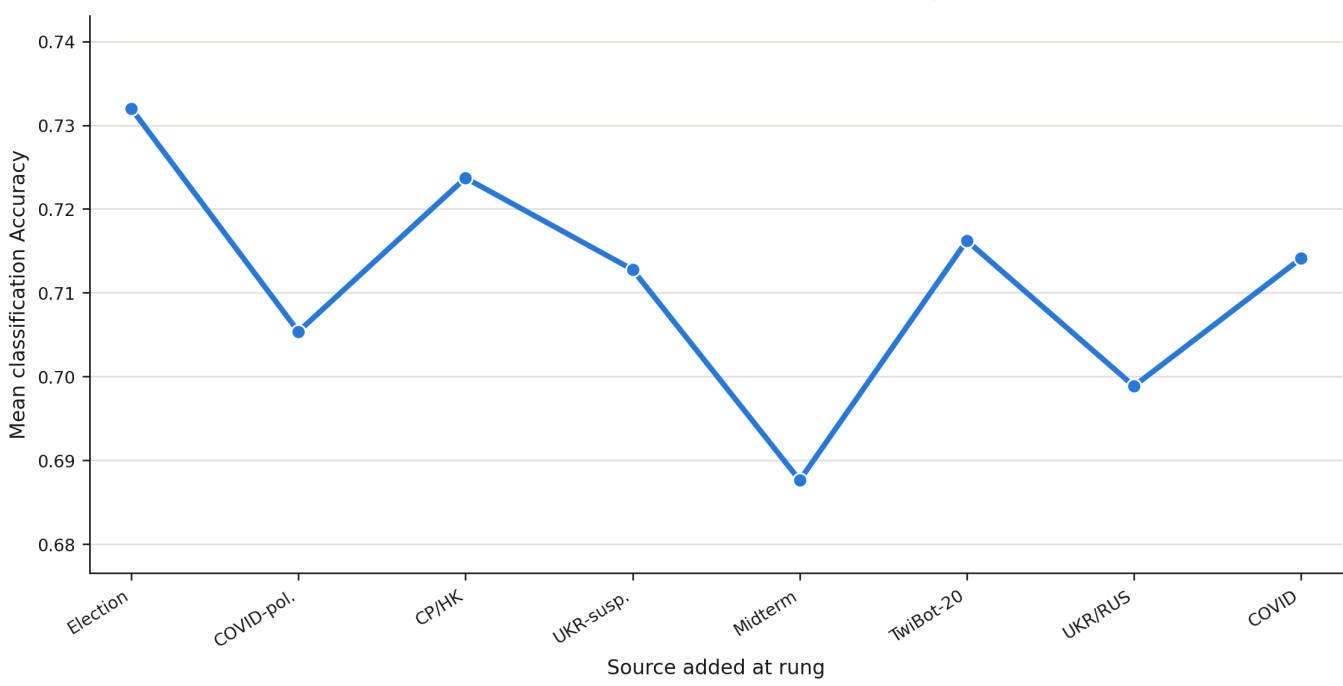

Classification Accuracy across mixture size

Fixed 10k/source · A · Fixed 10k examples per active source · mean across four evaluation graphs

Classification Accuracy across mixture size

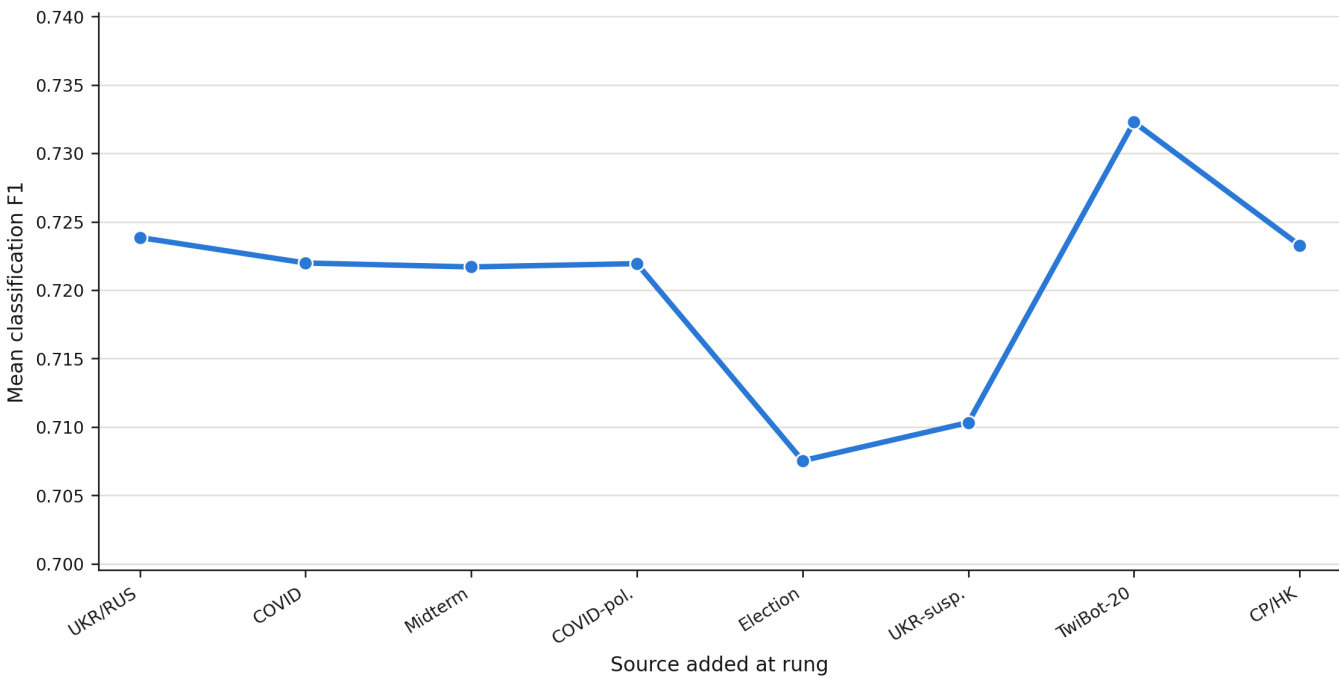

Fixed 10k/source · C · Fixed 10k examples per active source · mean across four evaluation graphs

F1

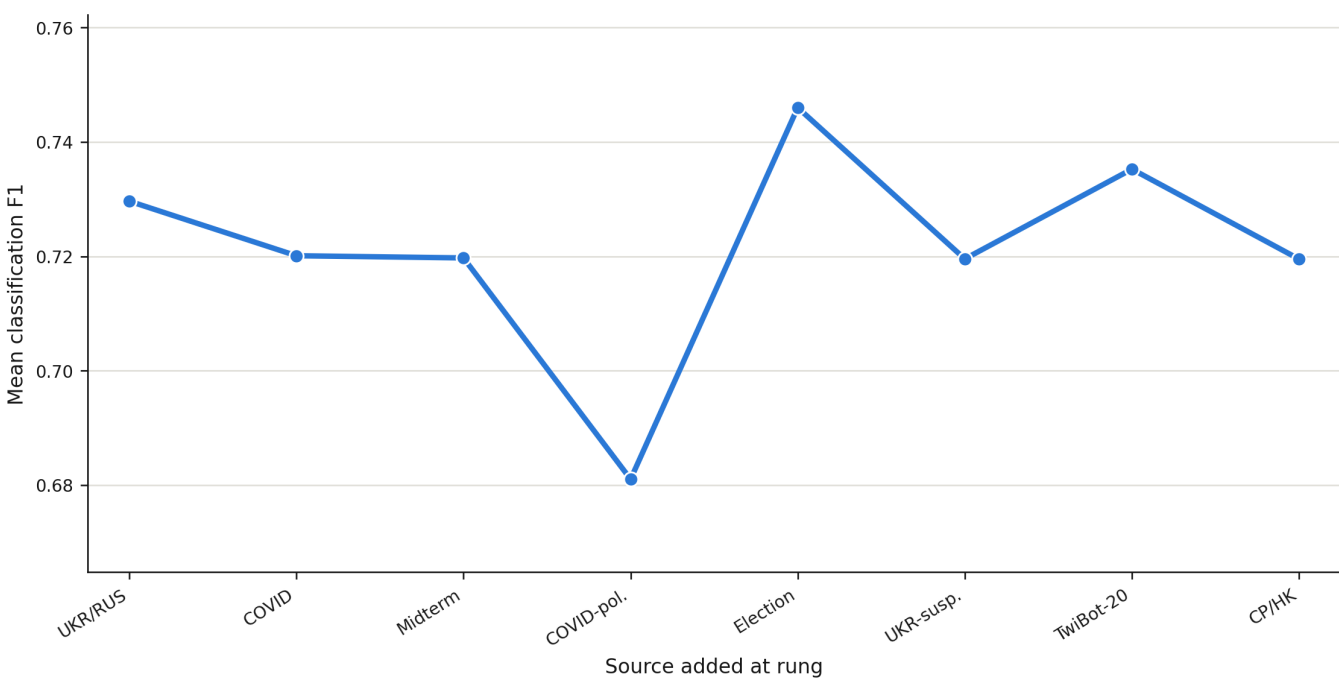

Classification F1 across mixture size

Matched 40k · A · Fixed total compute (40k steps) · mean across four evaluation graphs

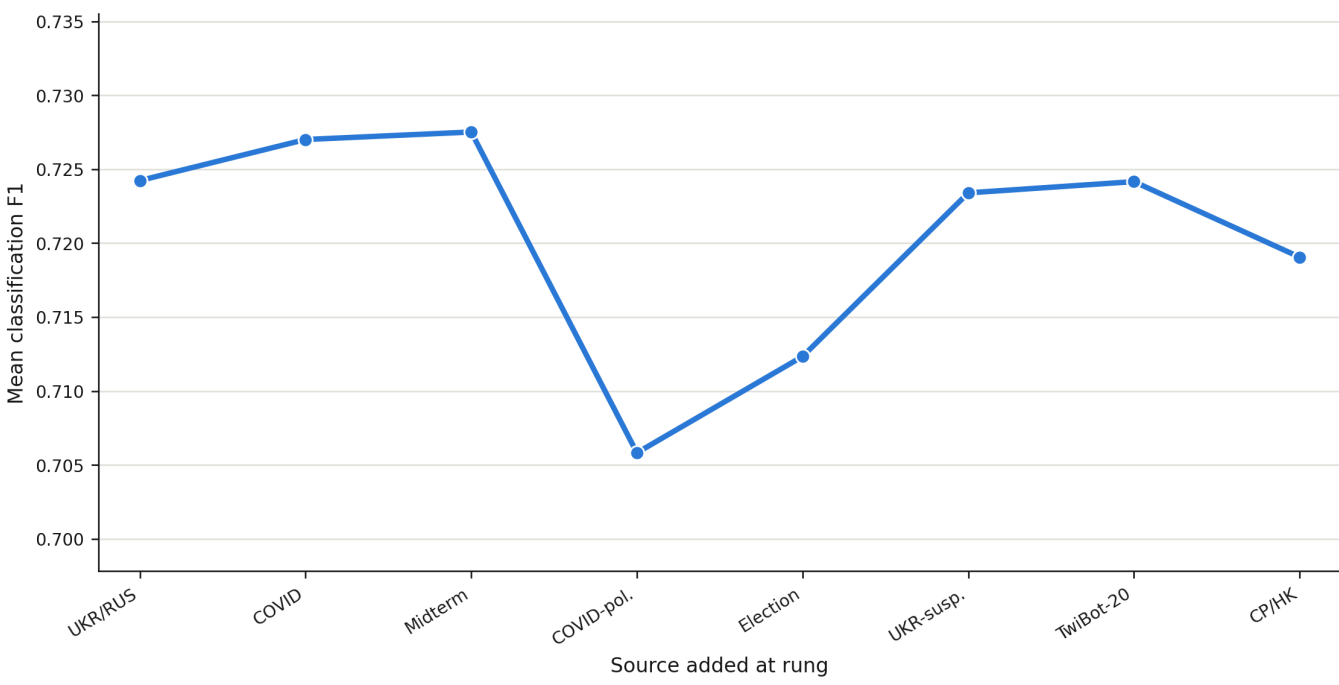

Classification F1 across mixture size

Sequential · A · Sequential schedule · fixed total compute (40k steps) · mean across four evaluation graphs

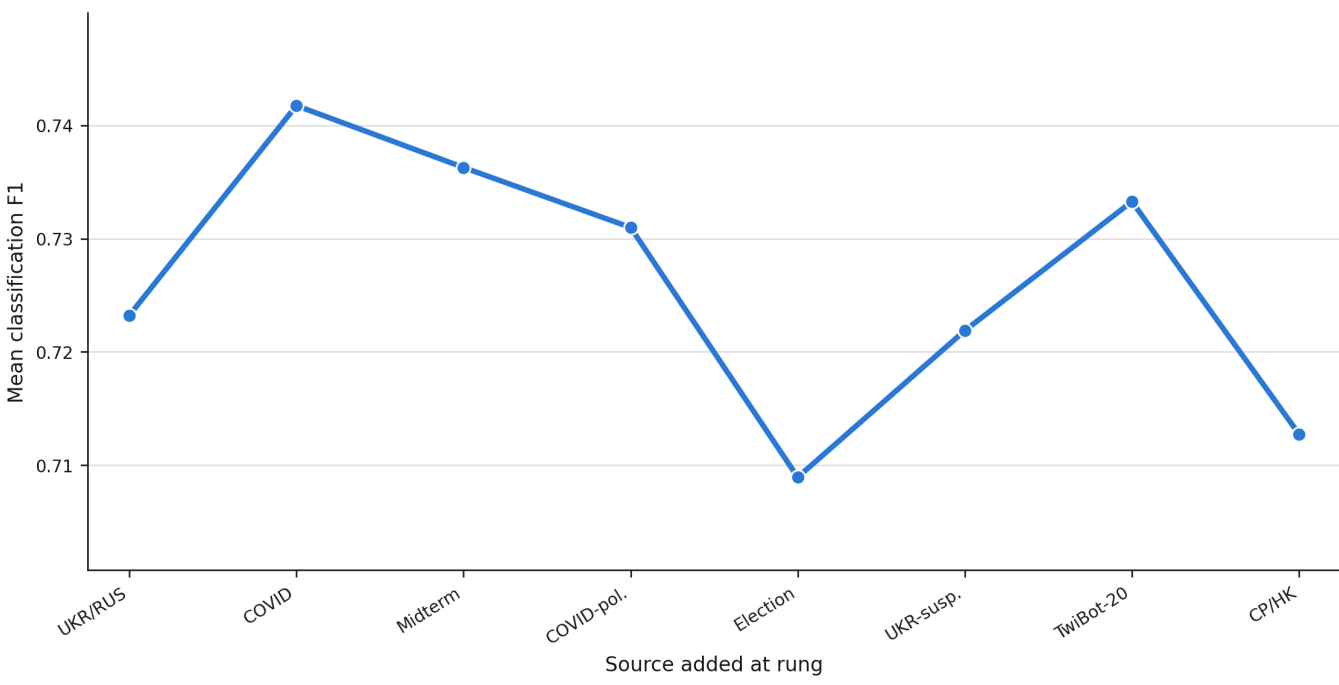

Classification F1 across mixture size

Split-aware · A · Split-aware · fixed total compute (40k steps) · mean across four evaluation graphs

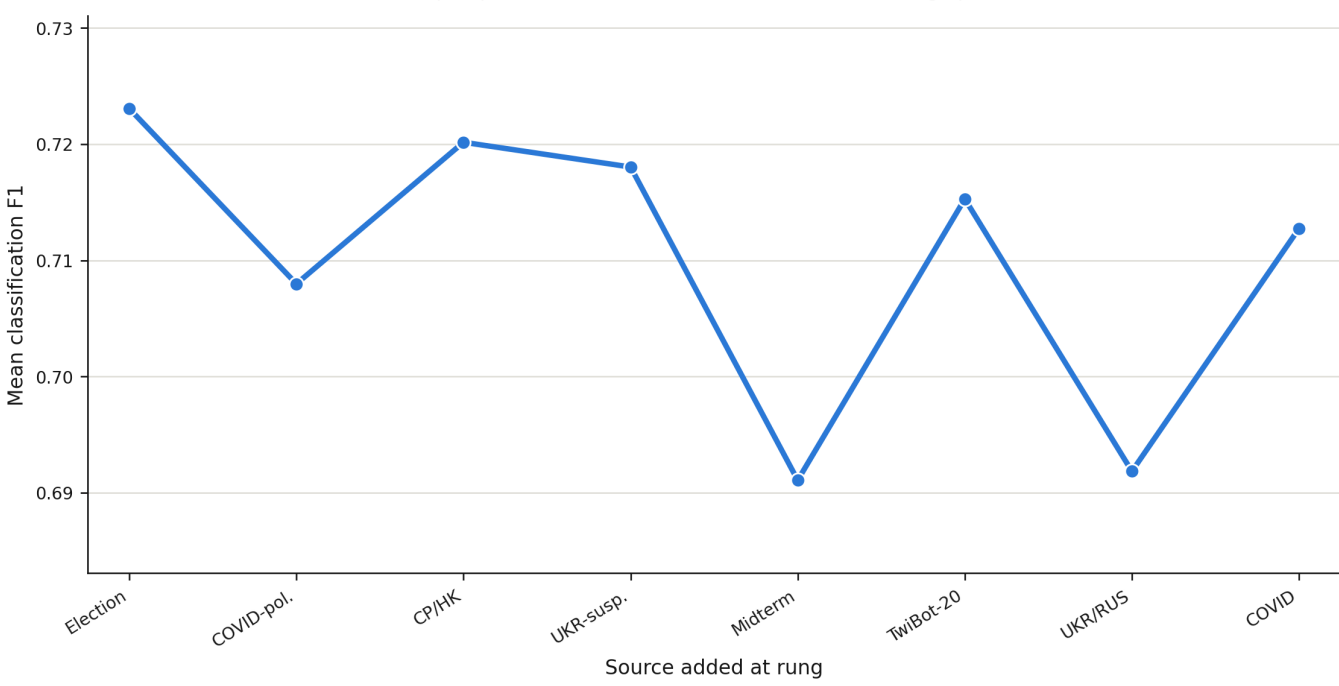

Classification F1 across mixture size

Fixed 10k/source · A · Fixed 10k examples per active source · mean across four evaluation graphs

Classification F1 across mixture size

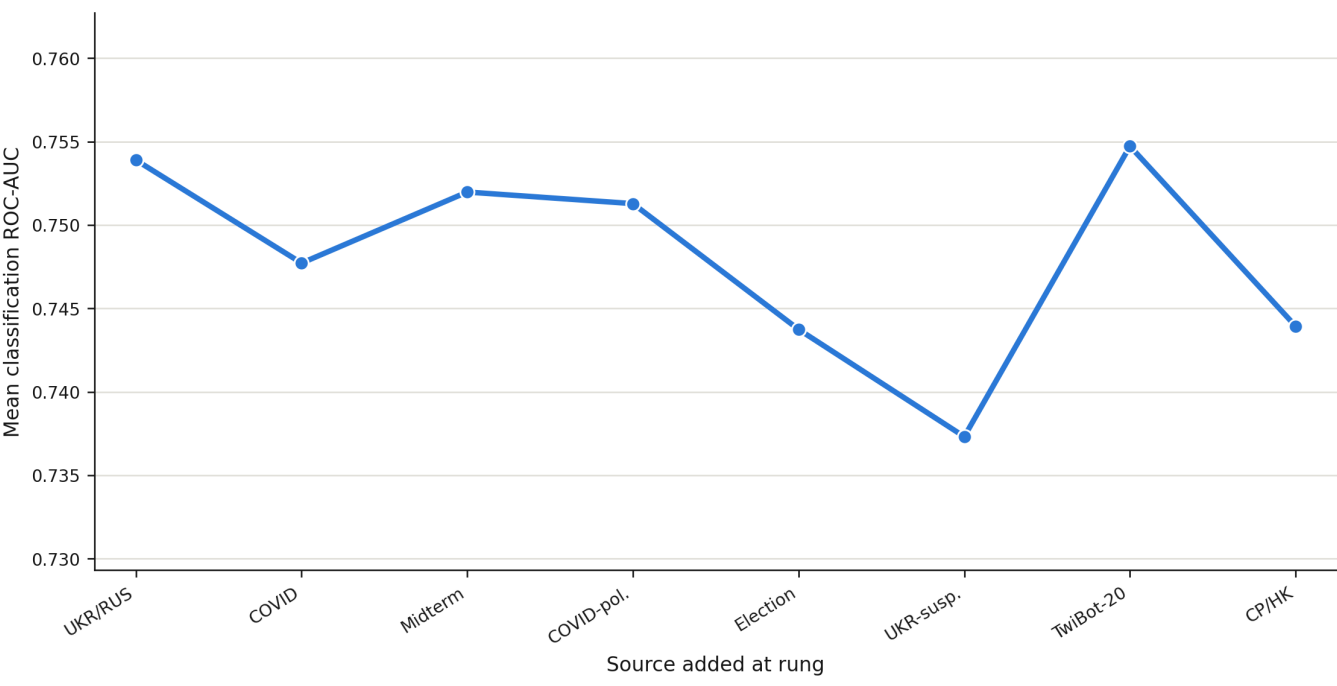

Fixed 10k/source · C · Fixed 10k examples per active source · mean across four evaluation graphs

ROC-AUC

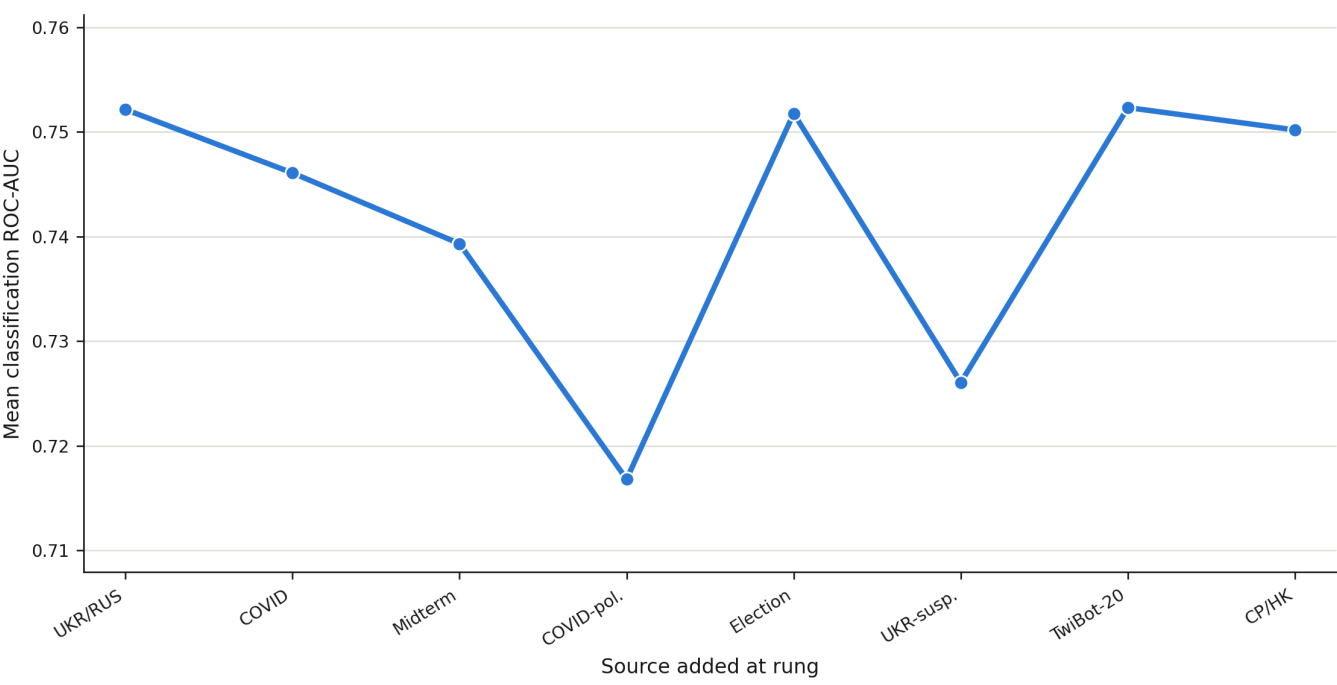

Classification ROC-AUC across mixture size

Matched 40k · A · Fixed total compute (40k steps) · mean across four evaluation graphs

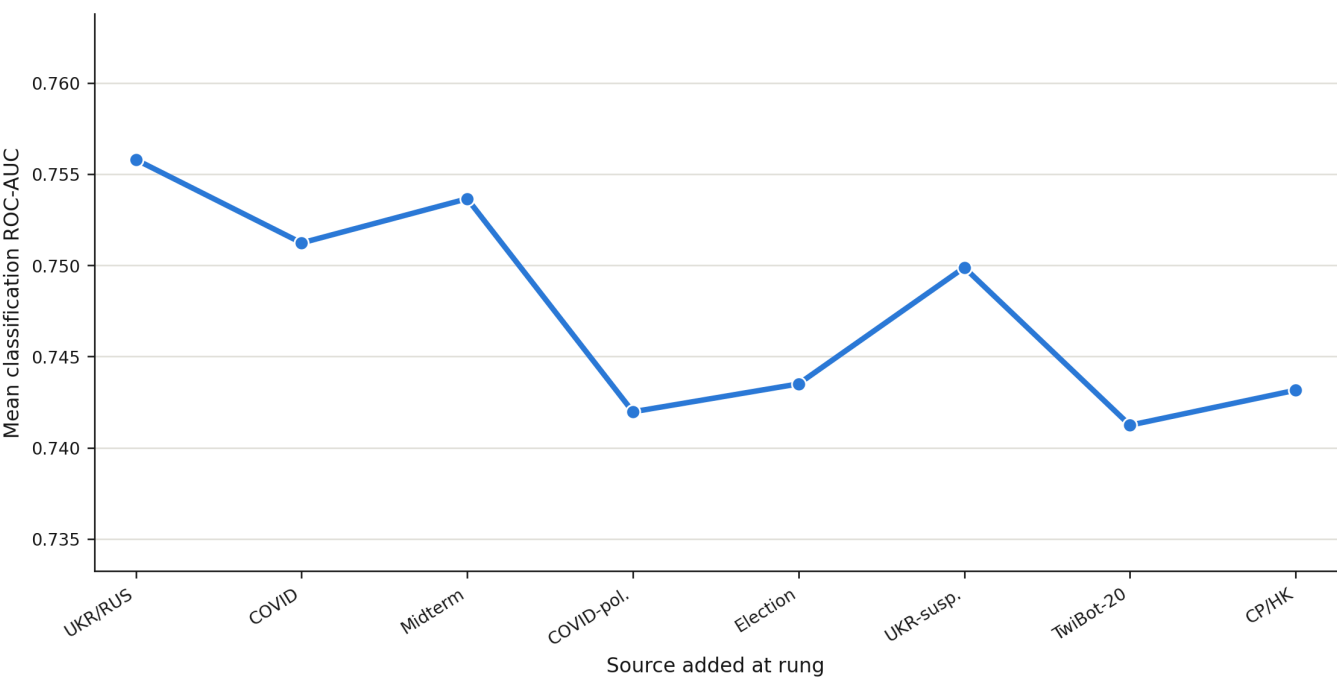

Classification ROC-AUC across mixture size

Sequential · A · Sequential schedule · fixed total compute (40k steps) · mean across four evaluation graphs

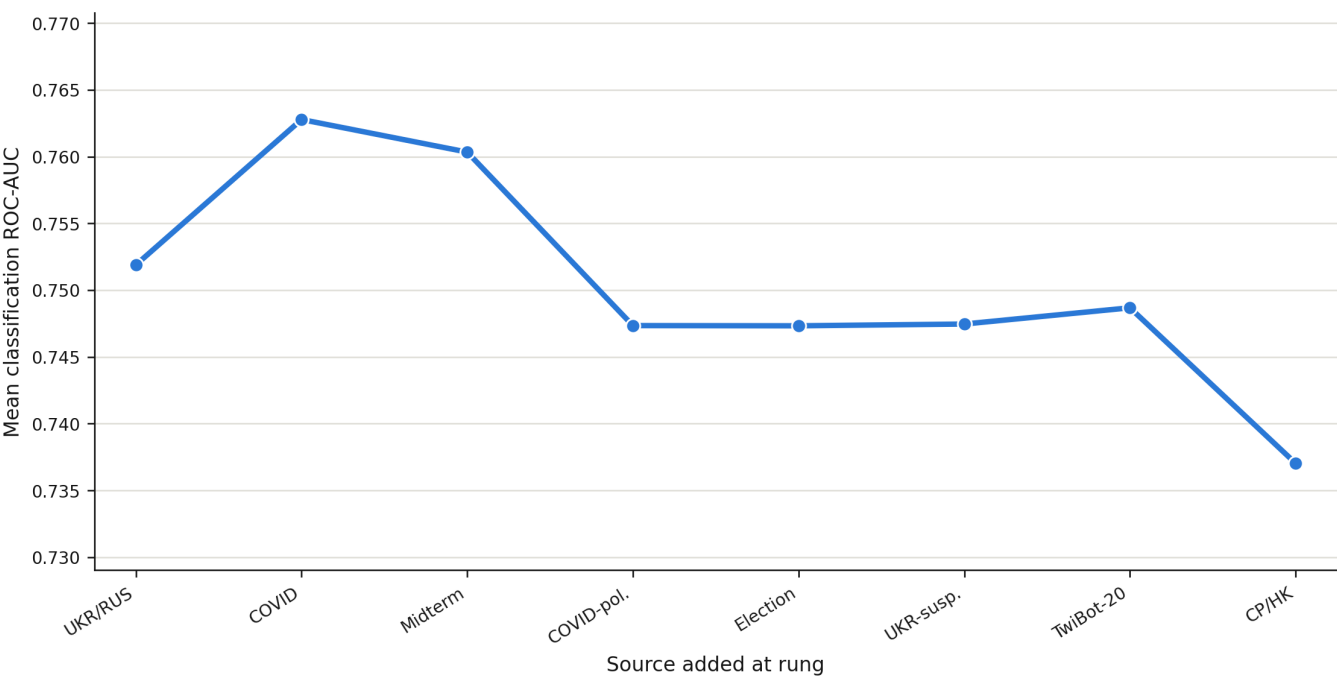

Classification ROC-AUC across mixture size

Split-aware · A · Split-aware · fixed total compute (40k steps) · mean across four evaluation graphs

Classification ROC-AUC across mixture size

Fixed 10k/source · A · Fixed 10k examples per active source · mean across four evaluation graphs

Classification ROC-AUC across mixture size

Fixed 10k/source · C · Fixed 10k examples per active source · mean across four evaluation graphs
